April 2008

Volume 1, Issue 2

## Ready! Set! Go!

Bernice O'Shea, our favorite designer, is committed to making your next ride the best possible experience for you. O'Shea is thus introducing her brand new "Excursion Set."

A compact carrying case that includes our 3 most innovative items, Towel, Skubee™ and Necksox™ of your choice. The excursion set is available in various colours to match your personality and your ride.

These riding essentials are made of the same moisture wicking technical fabrics. Designed in a way that keeps you cool in the sun and warm in the wind and dry whether in rain or heat; these items are a go for all seasons. In addition, the fabrics provide UVA and UVB protection.

The travel towel was discussed extensively in our last issue but the Skubee™ and the Necksox™

merit their own descriptions.

Skubee™ is an amalgamation of the terms "Skullcap" and "Beanie" they are both defined by the American Heritage Dictionary as "a small brimless cap."

Inspired by an intoxicating article on Skullcaps written by Reverend Antonio

Hernandez entitled "My Kingdom for a Crown: An Around-the-World History of the Skullcap and its Modern Socio-Political Significance," O'Shea desired to pioneer her own unique form of the "hat" in question.

The Skubee™ is created to wear under a helmet when riding and it can also be worn after the ride to conceal the dreadful possibility of helmet hair.

The Necksox™ was created to pro-

tect the uncovered region of the body, between the end of the jacket and the bottom of the helmet - the neck! It is imperative to the comfort of the any active person roughing the elements. Necksox™ can be worn in several different ways to also shelter the head, mouth, and face.

O'Shea designed another use for the Travel Towel. Now available in a Raucous Red to use as a flag in case of an emergency.

This excursion set is created for but not exclusive to the motorcycling niche market. These items individually have made their appearance in other sporting activities such as snowboarding, skiing, cycling, and many more.

## Going Ballistic!!!

Safety is of course of primary concern to all motorcycle enthusiasts.

A new innovative way of doing this has come into high demand – Kevlar!

Keeping loyal to her commitment to custom fit and quality assurance, Bernice has sourced and researched various aspects of Kevlar. She has been in contact with a testing facility in France to investi-

gate the abrasion of this fibrous fabric.

"A secondary line of protection," is what Mark Anderson, technical manager of our Kevlar source, calls it.

How to wear this 'super-fiber'?

Bernice will be incorporating Kevlar into her custom fitted jeans, with

light weight cotton muslin closest to your skin for added comfort.
